Objectives and investment policy

The Fund aims to achieve long-term capital growth over a period of at least 7 years.

The Fund will invest at least 70% in shares of UK companies (those domiciled or incorporated or that have a significant business in the UK). The Fund may also invest in companies listed on recognised UK stock exchanges but which may be domiciled, incorporated or have significant business elsewhere, which, in the Investment Manager's opinion, have good prospects for growth that exceeds that of the wider UK equity market. The focus of the Fund is new economy companies, which the Investment Manager defines as those that utilise new technologies, benefit from innovation, have a sustainability awareness or offer services and products that meet the demands of an evolving global economy.

The Investment Manager also has the flexibility to invest in new issues meaning, typically, Initial Public Offerings (or IPOs), which generally mark the first sale of shares by a privately-owned company in order to gain a stock market listing. However, it may also include "share

The price of the Fund and any income from it can go down as well as offers" (meaning sales of stock by companies that are already listed up and is not guaranteed. Investors may not get back the amount on one of the Fund's eligible markets), which will necessarily have a invested. Past performance is not a guide to future performance. higher risk than investments in established companies. Where the Fund invests into other investment funds, they may invest The Fund may also invest in: in different assets, countries or economic sectors and therefore have shares outside the UK different risk profiles not in line with those of the Fund. · other transferable securities · Where the Fund invests in warrants, these may be hard to buy and sell other investment funds and their prices may move up and down suddenly. This could · cash, deposits and money market instruments significantly impact investment performance. • warrants. The Fund is entitled to use derivative instruments for EPM. Derivatives The Fund may use derivatives for Efficient Portfolio Management may not achieve their intended purpose. Their prices may move up or (EPM), i.e. to protect against market or currency movements, to down significantly over relatively short periods of time which may result reduce costs, or to earn income or capital. in losses greater than the amount paid. This could adversely impact the value of the Fund. The organisation from which the Fund buys a Any income the Fund generates will be paid out to you. derivative may fail to carry out its obligations, which could also cause losses to the Fund. You can buy and sell units on any working day in London. The price of gold or other resources may be subject to sudden, unexpected and substantial fluctuations. This may lead to significant The Fund is actively managed, which means that the manager has declines in the values of any companies developing these resources in discretion over the composition of its portfolio, and the Fund is not which the Fund invests and significantly impact investment tracking a benchmark nor is the Fund constrained by the value, price performance. or components of a benchmark or any other aspect. The Fund is also not aiming to match or exceed the return of any benchmark. The Fund may invest in securities not denominated in sterling, the value of your investments may be affected by changes in currency exchange For full investment objectives and policy details please refer to the rates. Prospectus. · For full details on risk factors for this Fund, please refer to the

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

4

5

Typically higher rewards,

6

higher risk

7

The Fund is in a higher category because the price of its investments have risen or fallen frequently and more dramatically than some other types of investment. The category shown is not guaranteed to remain unchanged and may shift over time. Even the lowest category does not mean a risk-free investment. Prospectus.
